FuseIQ v3.0 — Social Media Launch Kit

Abbasi Global LLC | Florida, USA | Launch Date: TBD

Twitter/X Launch Thread (10 Tweets)

Tweet 1 — Hook

🚀 Introducing FuseIQ — The Operating System for AI-Native Teams.

After 6 months of building, 250+ beta users, and 1,200+ workflows executed, we're ready to show the world what we've built.

Thread 🧵 👇

Tweet 2 — The Problem

AI tools are exploding, but teams have ZERO command center.

❌ Siloed agents ❌ Broken workflows ❌ Unpredictable costs ❌ 40% of AI budget wasted on rework

Teams are flying blind while spending millions on AI.

Tweet 3 — The Solution

Enter FuseIQ.

✅ Visual agent builder (no-code → full-code) ✅ Multi-model orchestration (GPT-4, Claude, Gemini, Llama) ✅ Real-time cost & quality monitoring ✅ Enterprise security built-in

One platform. All your AI agents. Total control.

Tweet 4 — Product Demo

[Video/GIF Placeholder: Workflow builder in action]

Drag. Drop. Deploy.

Build complex AI agent workflows in minutes, not weeks.

No engineering PhD required.

Tweet 5 — Traction

Numbers don't lie:

📊 250+ beta users 📊 1,200+ workflows executed 📊 72 NPS score 📊 15% weekly growth 📊 3 enterprise pilots in negotiation

Early signals are STRONG.

Tweet 6 — Market Opportunity

The AI operations market is hitting $50B by 2028.

But here's the thing — most "AI orchestration" tools are built for developers, not teams.

We're building for the people actually USING AI to run businesses.

Tweet 7 — Competitive Edge

AutoGen? Code-only. CrewAI? Limited. LangChain? Complex. Dify? Good, but not enterprise-ready.

FuseIQ = Purpose-built for teams + Enterprise-ready from Day 1.

That's the difference.

Tweet 8 — Team

Built by @awaisabbasi (serial entrepreneur, fintech + SaaS operator) and a world-class engineering team.

Small team. Massive execution.

We're not a startup. We're a precision strike.

Tweet 9 — The Ask

We're raising $500K seed to accelerate Phase 2-3.

If you're an angel investor who believes AI-native teams need a command center, let's talk.

DMs open. 📩

Tweet 10 — CTA

RT this thread to help us reach teams who need FuseIQ.

Let's build the future of work. Together.

LinkedIn Launch Post

🚀 We're Live: FuseIQ — The Operating System for AI-Native Teams

After six months of intensive development, I'm thrilled to announce that FuseIQ is officially launching to the public.

The Problem We Solve

AI adoption is accelerating, but teams are struggling with fragmentation. Most organizations now use 10+ AI tools, yet have no unified way to orchestrate, monitor, or optimize them. The result? Broken workflows, unpredictable costs, and wasted potential.

Our Solution

FuseIQ provides a single platform to: • Build AI agent workflows visually (no-code to full-code) • Orchestrate across multiple models (GPT-4, Claude, Gemini, Llama, Mistral) • Monitor costs, latency, and quality in real-time • Deploy with enterprise-grade security (SSO, RBAC, audit logs)

Traction So Far

✅ 250+ beta users with 72 NPS ✅ 1,200+ workflows executed ✅ 3 enterprise pilots in active negotiation ✅ 15% weekly user growth

The Market

AI operations software is a $50B market by 2028. We're not just riding the wave — we're building the infrastructure that makes AI adoption sustainable at scale.

What's Next

We're currently raising a $500K seed round to accelerate our product roadmap and go-to-market. If you're an investor interested in the future of AI operations, I'd love to connect.

Try FuseIQ Today

🔗 https://fuseiq.io ⭐ https://github.com/abbasi8586/fuseiq

Thank you to our beta users, design partners, and early supporters. This is just the beginning.

Product Hunt Description

Product Name

FuseIQ — The OS for AI-Native Teams

Tagline

Build, orchestrate, and monitor AI agent workflows at scale

Description

FuseIQ is the operating system for AI-native teams. We provide a unified platform to build, orchestrate, monitor, and scale AI agent workflows — from no-code visual builders to enterprise-grade deployments.

Key Features: 🎨 Visual workflow builder with drag-and-drop interface 🤖 Multi-model orchestration (GPT-4, Claude, Gemini, Llama, Mistral) 📊 Real-time cost, latency, and quality monitoring 🔒 Enterprise security (SSO, RBAC, audit logs, on-premise option) 🚀 Pre-built agent templates and marketplace 👥 Team collaboration with version control

Perfect for: • Teams using multiple AI tools who need a command center • Startups building AI-powered products • Enterprises scaling AI operations securely • Developers who want visual orchestration without sacrificing power

Why we're different: Unlike AutoGen (code-only), CrewAI (limited), or LangChain (complex), FuseIQ is purpose-built for teams — not just developers. We're enterprise-ready from Day 1 with transparent pricing.

Traction: 250+ beta users | 1,200+ workflows | 72 NPS | 15% weekly growth

Artificial Intelligence, SaaS, Developer Tools, Productivity, Enterprise Software

Makers

Awais Abbasi (CEO & Founder)

First Comment (by Founder)

👋 Hey Product Hunt!

I'm Awais, founder of FuseIQ. We built this because we experienced the AI chaos firsthand — 12 different tools, zero visibility, and a lot of wasted budget.

What we built: A true command center for AI operations. Not just another wrapper around OpenAI's API, but a comprehensive platform for building, running, and optimizing multi-agent workflows.

What makes us different: • Visual builder that actually works for complex workflows • Cost monitoring that prevents bill shock • Enterprise features that don't require an enterprise sales cycle • Open core philosophy — extensible, community-driven

Ask: We'd love your feedback on the workflow builder and monitoring dashboard. What's your biggest pain point with AI tools right now?

Also — we're raising a $500K seed. If any angels in the PH community are interested in AI operations, my DMs are open.

Thank you for checking us out! 🙏

Indie Hackers Post

Title

Launched FuseIQ — The OS for AI-Native Teams (250+ beta users, $500K seed raise)

Body

Hey Indie Hackers! 👋

After 6 months of bootstrapped development, I'm launching FuseIQ — a platform that helps teams build, orchestrate, and monitor AI agent workflows.

What problem does it solve?

If you're using multiple AI tools (ChatGPT, Claude, custom agents), you know the pain: - No unified view of what's running - Costs that spike unexpectedly - Workflows that break when handoffs fail - No way to monitor quality or optimize spend

FuseIQ is the command center I wished existed when I was managing AI operations at scale.

What we built:

1. **Visual Workflow Builder** — Drag-and-drop interface that scales from simple automations to complex multi-agent systems. No-code to full-code.
2. **Multi-Model Orchestration** — Use GPT-4, Claude, Gemini, Llama, and Mistral through one interface. Automatic model selection based on task + cost.
3. **Real-Time Monitoring** — Track every dollar spent, every latency spike, every quality drop. Alerts when things go wrong.

4. **Enterprise Security** — SSO, RBAC, audit logs, and optional on-premise deployment. Because "move fast and break things" doesn't work in regulated industries.

Traction so far:

• 250+ beta users (15% weekly growth) • 1,200+ workflows executed • 72 NPS from early adopters • 3 enterprise pilots in negotiation • 180+ GitHub stars (organic)

Business model:

Freemium SaaS. Starter tier is free (3 agents, 1,000 runs/mo). Pro is $49/user/mo. Enterprise starts at $500/mo with custom pricing.

The raise:

We're raising $500K seed on a $3M cap SAFE. Use of funds: 50% product/engineering, 25% sales/marketing, 15% operations, 10% reserve.

What I need from this community:

1. Feedback on the product — try it at https://fuseiq.io
2. Introductions to teams struggling with AI orchestration
3. Investor intros if you know angels interested in AI infrastructure

Tech stack: Next.js 15, TypeScript, Tailwind, Supabase, Framer Motion

Happy to answer any questions! What are you building with AI agents?

Email Announcement Template

Subject Line Options

1. 🚀 FuseIQ is live — The OS for AI-Native Teams
2. Introducing FuseIQ: One platform for all your AI agents
3. After 6 months of building, we're ready to show you FuseIQ

Email Body

Hi [First Name],

Today, I'm excited to announce the launch of **FuseIQ** — the operating system for AI-native teams.

What is FuseIQ?

If your team uses multiple AI tools, you know the chaos: siloed agents, broken workflows, unpredictable costs, and no way to see the big picture.

FuseIQ solves this with a unified platform to:

✅ **Build** AI agent workflows visually (no-code to full-code) ✅ **Orchestrate** across GPT-4, Claude, Gemini, Llama, and Mistral ✅ **Monitor** costs, latency, and quality in real-time ✅ **Scale** with enterprise security (SSO, RBAC, audit logs)

Our traction so far:

• 250+ beta users with a 72 NPS • 1,200+ workflows executed on the platform • 15% weekly user growth • 3 enterprise pilots in active negotiation

Try FuseIQ free: https://fuseiq.io

What makes us different:

Unlike developer-focused tools (AutoGen, CrewAI, LangChain), FuseIQ is built for the teams actually using AI to run businesses — with enterprise security and transparent pricing from Day 1.

We're also raising a $500K seed round to accelerate our roadmap. If you're an investor or know someone who should see this, I'd love an introduction.

Thank you for being part of this journey. Your early feedback shaped what we've built, and I'm excited to keep improving FuseIQ with your input.

To the future of work,

Awais Abbasi CEO & Founder, FuseIQ Abbasi Global LLC

P.S. — Star us on GitHub if you like what we're building:

Beta Invitation Email

Subject Line

You're invited: FuseIQ private beta (exclusive access)

Email Body

Hi [First Name],

You've been selected for the **FuseIQ private beta** — exclusive early access to the operating system for AI-native teams.

What you get:

🚀 Full platform access (all features, all models) 💬 Direct line to the founding team via Discord 🎁 3 months free Pro tier when we launch publicly 🏆 "Founding Member" badge on your profile

What we need from you:

• Use FuseIQ for your AI workflows • Share feedback (good, bad, ugly — we want it all) • Report bugs via our feedback portal • Join our weekly community calls (optional)

Get started:

1. Create your account: [BETA_SIGNUP_LINK]
2. Join our Discord: https://discord.gg/fuseiq
3. Book an onboarding call: [CALENDLY_LINK]

Quick start ideas:

• Build a customer support agent workflow • Create a research synthesis pipeline • Set up automated content generation • Orchestrate a multi-model comparison workflow

Questions? Reply to this email or ping us on Discord.

We're building FuseIQ for teams like yours. Your feedback directly shapes our roadmap.

Welcome aboard,

Awais Abbasi CEO & Founder, FuseIQ

30-Day Pre-Launch Content Calendar

Week 1: Awareness & Education

Day	Platform	Content Type	Topic
1	Twitter	Thread	"The AI Tool Stack Problem" — Why teams need a command center
1	LinkedIn	Article	"Why 40% of AI Budget Is Wasted (And How to Fix It)"
2	Twitter	Poll	"How many AI tools does your team use?"
2	Blog	Post	"The Rise of AI-Native Teams"
3	Twitter	Tip	Quick tip: Monitoring AI costs effectively
3	LinkedIn	Post	Founder story: Why I started FuseIQ

Day	Platform	Content Type	Topic
4	Twitter	Thread	“5 Signs Your Team Needs AI Orchestration”
4	Newsletter	Issue 1	Market analysis + product teaser
5	Twitter	Meme/GIF	Relatable AI chaos meme
5	LinkedIn	Post	Team spotlight: Introducing the engineering team
6	Twitter	Thread	“Comparing AI Orchestration Tools” (educational)
6	Blog	Post	Technical deep-dive: Multi-model orchestration
7	All	Rest	Community engagement, reply to comments

Week 2: Product Teasers & Social Proof

Day	Platform	Content Type	Topic
8	Twitter	Video/GIF	Teaser: Workflow builder interface
8	LinkedIn	Post	"What 250 beta users taught us about AI operations"
9	Twitter	Thread	"Behind the Scenes: Building FuseIQ"
9	Blog	Post	"Our Tech Stack: Why We Chose Next.js 15 + Supabase"
10	Twitter	Screenshot	Monitoring dashboard preview
10	LinkedIn	Post	Customer story: [Beta user testimonial]
11	Twitter	Thread	"Enterprise AI Security: What

Day	Platform	Content Type	Topic
			Actually Matters"
11	Newsletter	Issue 2	Beta user stories + feature roadmap
12	Twitter	Poll	"What's your biggest AI operations challenge?"
12	LinkedIn	Post	"The $50B AI Operations Market by 2028"
13	Twitter	Video	Teaser: Multi-model orchestration demo
13	Blog	Post	"Open Core vs. Closed Source: Our Philosophy"
14	All	Rest	Community engagement, AMA prep

Week 3: Launch Prep & Hype Building

Day	Platform	Content Type	Topic
15	Twitter	Thread	“Countdown to Launch: 15 Days”
15	LinkedIn	Post	“What to Expect from FuseIQ at Launch”
16	Twitter	Video	Feature highlight: Visual builder walkthrough
16	Blog	Post	“Pricing Transparency: Our Philosophy”
17	Twitter	Thread	“10 Ways Teams Will Use FuseIQ”
17	LinkedIn	Post	“Raising $500K: Why We Need Capital to Scale”
18	Twitter	Screenshot	Agent marketplace preview

Day	Platform	Content Type	Topic
18	Newsletter	Issue 3	Launch announcement + exclusive early access
19	Twitter	Thread	“Meet the Team Behind FuseIQ”
19	LinkedIn	Post	“From Idea to 250 Users: Our 6-Month Journey”
20	Twitter	Video	Teaser: Enterprise security features
20	Blog	Post	“AI Agent Workflows: A Complete Guide”
21	All	Rest	Final prep, community warm-up

Week 4: Launch Week 🚀

Day	Platform	Content Type	Topic
22 (Launch Day)	All	Launch	Official announcement across all channels
22	Product Hunt	Launch	Live on Product Hunt — upvote + share
22	Indie Hackers	Post	Launch post with traction metrics
23	Twitter	Thread	"Day 1 Launch Recap"
23	LinkedIn	Post	"Thank you to our early supporters"
24	Twitter	Video	"How to Build Your First Workflow in FuseIQ"
24	Blog	Post	"Launch Day Numbers" (transparent metrics)

Day	Platform	Content Type	Topic
25	Twitter	AMA	“Ask Me Anything about AI Operations”
25	LinkedIn	Post	“What We Learned from Launch Day”
26	Twitter	Thread	“What’s Next: Phase 2 Roadmap”
26	Newsletter	Issue 4	Launch week recap + what’s coming
27	Twitter	Poll	“Which feature should we build next?”
27	LinkedIn	Post	“Hiring: Join the FuseIQ Team”
28	All	Rest	Community engagement, respond to all feedback
29	Twitter	Thread	“Week 1 Post-Launch: The Numbers”
29	Blog	Post	“Lessons from Our First Week”

Day	Platform	Content Type	Topic
30	All	Planning	Plan Month 2 content calendar

Content Themes by Week

- **Week 1**: Problem awareness, market education
- **Week 2**: Product teasers, social proof, trust building
- **Week 3**: Launch hype, feature deep-dives, founder stories
- **Week 4**: LAUNCH, community building, momentum maintenance

Posting Schedule

- **Twitter**: 1-2 posts daily (morning + afternoon EST)
- **LinkedIn**: 1 post every 2 days (morning EST)
- **Blog**: 2 posts per week (Tuesday + Thursday)
- **Newsletter**: 1 issue per week (Wednesday)
- **Product Hunt**: Launch day + follow-up
